Planux Lux is much more than a door entry monitor. It is a new perception of elegance.

It has all technological content of Planux, plus a stylish glass surface "reflecting" the style of every home or office. Pure lines, unmistakable design and a stylish screen act as a frame for sensitive touch technology, which makes it possible to activate functions by simply brushing the controls. Because true style is a real virtue. And transparent.

BLACK

PLANUX +LUX

WHITE

Planux Lux. The expressiveness of glass lets the simple and intuitive language of the hi-tech multi-functional monitor shine through: from the audio-video and lock-release options to the Full-duplex hands-free function for a face-to-face dialogue effect, and from the internal intercom device to menu and melody customisation.

High-level technology, a few millimetres, two colours: black or white.
